

# Green Solvents™

## Applications

EthicalChem's Green Solvents™ are solvent and solvent-surfactant blends designed to be applied full strength or diluted with water for dissolving asphaltenes, paraffins, and hydrocarbon residues. Green Solvents are high performance, safe alternatives to xylene, toluene, benzene, and mineral spirits.

## Features/Benefits

- High Flashpoint
- Safer for employees and the environment
  - No ODC - Ozone Depleting Compounds
  - No HAP - Hazardous Air Pollutants
  - No carcinogens
  - Contains no harmful acids or caustics
  - Expected to be readily biodegradable

## Technical Data
